

TD54MD

CNC multiprofile raised panel router cutter Piattabande multiprofilo per specchietti di antenna

The **TD54MD** small panel cutterheads, thanks to their double-knives, allow for an excellent finish on all kinds of wood, from the hardest to the softest, working both with and perpendicular to the grain, regardless of the operating conditions. Their reduced size, along with the possibility of installing tools upon the CNC pantograph, allow for the realization of small panels with the same profiles as those for the code **TD55M** cutterheads.

Le **TD54MD** per specchietti permettono, grazie alla presenza del doppio coltello, super finiture con tutti i tipi di legno, da quello più duro a quello più tenero, indipendentemente dalla condizione di lavoro, sia lungo che attraverso vena. Le dimensioni ridotte e la possibilità di montare gli utensili su pantografi CNC permettono di creare specchietti con gli stessi profili delle **TD55M**.
