

# DUO ULTRA LINE

[Go back](#)

Aggregate with gear reduction.

Ideal for the use with a large diameter saw blade or a rough milling tool. Using the optimum motorspindle torque and the optimum saw blade/tool speed.

## Technical Data

 Drilling	3000 - 9000 (RPM)	●
 Milling	up to 8.100 (RPM)	●
 Sawing	Tool Ø 300mm / Cutting depth max. 120mm / Speed 3500 - 4500 (RPM)	●
 Moulding		◐
 Sanding		●
Working direction	horizontal	✓
	fix	✓
Number of tooloutputs		2
gear ratio		1:0,67
 lubrication: oil		

Legend: ● very suitable    ◐ partly suitable

## Advantages

1. Maximum torque 22 Nm
2. Available in three different programming lengths
3. With permanent oil bath lubrication
4. High rigidity of spindle due to large bearing distance
