

# MEGA CUTTER ULTRA LINE

[Go back](#)

Aggregate with gear reduction

Ideal for the use with a moulder spindle or a saw blade package. Using the optimum motorspindle torque and the optimum saw blade/tool speed.

## Technische Daten

 Sawing	Tool Ø 160mm / Cutting depth max. 48mm / Speed 7690 (RPM)	●
 Moulding		●
 Sanding		●
Working direction	horizontal	✓
	fix	✓
Number of tooloutputs		1
gear ratio		1:0,67
 lubrication: oil		

Legend:

● very suitable

◐ partly suitable

## Product Information

## Advantages

1. Oil bath lubricated bevel gears
2. Extremely compact and light weight
3. Simplified tool change
4. For moulder tool and saw blade package.
5. Almost play-free drive for operation conform to feed direction
