 L'azienda è nata nel 1982 in Besenello; i fondatori Oliviero e Zita Adami le hanno dato il nome IMMER e dalla sua fondazione si è sempre distinta per la ricerca di nuovi prodotti e la grande cura qualitativa degli utensili.

Nel 1992 con l'entrata dei figli Gianluca e Donatella ha assunto l'attuale nome "G.D.A." e la produzione è stata ulteriormente potenziata e automatizzata fino ad arrivare ad oggi, dove tutte le fasi sono robotizzate. L'ottimo risultato ottenuto ha permesso l'introduzione della G.D.A. in ogni continente, facendone una delle maggiori realtà nella costruzione di lame circolari in metallo duro.

Dal 2006 è presente in Repubblica Ceca la GDA PIKL diretta dal Sig. Píkl; l'azienda è dotata di un magazzino molto fornito ed un servizio di vendita e assistenza capillare sul territorio.

Dal 2010 iniziano anche molte altre collaborazioni con vari distributori in molti paesi Europei.

Nel 2015 vengono introdotti nuovi sistemi di controllo, il tutto per continuare a migliorare la qualità del prodotto GDA.

Nel 2017 abbiamo iniziato un percorso di rinnovamento tecnologico in tutti i reparti nella programmazione e gestione della produzione. Questo processo è terminato nel 2019, ora tutti i reparti sono dotati di tablet dove gli operatori trovano tutte le istruzioni, tutte le macchine sono connesse in rete e controllate da un software GesPRO sviluppato internamente. Tutta la produzione è quindi connessa secondo industria 4.0, questo ci ha permesso un nuovo ulteriore sviluppo tecnologico con notevoli benefici in termini di produttività e controllo.

 The production started in 1982 in Besenello with IMMER's name from Oliviero and Zita Adami. From the beginning the factory's been distinguished for the constant development, particularly for the research of new products and for the quality and the improvement of the articles already in production.

In 1992 with the entry of their children Gianluca and Donatella it took the actual name "G.D.A." and actually after the continuous development, all the lines of production are robotized. Thanks to the excellent result, the G.D.A.'s circular saw blades have been exported in every continent and G.D.A. is now one of the most important producers.

Starting from 2006 it's present in Czech Republic the company GDA PIKL directed by Mr. Píkl; the company is equipped with a very stocked warehouse and widespread trade and assistance service locally present.

From 2010 many other collaborations started with different suppliers in many European Countries.

From 2015 new control systems have been introduced, all to keep improving the quality of GDA product.

From 2017 we started a path of technological renovation in all the departments, in the organization and management of the production. This process ended in 2019; now all the departments are equipped with tablets where the operators find all the instructions; all the machines are connected to the network and controlled by a GesPRO software, internally developed. All the productions are therefore connected following the Industry 4.0: it allowed us a new and additional technological development with considerable benefits in terms of productivity and control.

 La société a été fondée en 1982 à Besenello avec le nom IMMER par Oliviero et Zita Adami. L'usine s'est toujours distinguée pour le constant développement en particulier pour la recherche de nouveaux produits et pour l'amélioration et le perfectionnement des articles déjà en production.

En 1992 avec l'entrée des fils Gianluca et Donatella, l'entreprise a pris le nom « G.D.A. » et la production a été encore améliorée jusqu'à présent où toutes les étapes sont automatisées.

L'excellent résultat a permis l'introduction des scies circulaires GDA dans chaque continent, en y faisant de la même, un des plus importants producteurs des scies circulaires actuellement existantes.

Depuis 2006 la société GDA PIKL, dirigée par Monsieur Píkl, est présente en République Tchèque; cette société est équipée d'un magasin très fourni et d'un service de vente et assistance présent sur tout le territoire.

A partir du 2010 aussi beaucoup d'autres collaborations avec différents distributeurs en beaucoup des pays européens commencent aussi.

A partir du 2015 des nouveaux systèmes de contrôle sont introduits; tout pour continuer à améliorer la qualité du produit GDA.

En 2017 on a commencé un parcours de renouvellement technologique en tous les ateliers, en la programmation et la gestion de la production. Ce processus est terminé en 2019; maintenant tous les ateliers sont équipés avec de tablettes où les opératrices trouvent toutes les instructions; toutes les machines sont connectées au réseau et contrôlées par un logiciel GesPRO internement développé. Toute la production est donc connectée selon l'Industrie 4.0; ça nous a permis un nouveau ulterieur développement technologique avec considérables bénéfices en termes de productivité et contrôle.

 La empresa nació en el 1982 a Besenello; los fundadores Oliviero y Zita Adami le han dado el nombre IMMER y desde su fundación siempre se ha caracterizada por la búsqueda de nuevos productos y la gran cura de calidad de los utensilios.

En el 1992 con la entrada de los hijos Gianluca e Donatella han tomado el actual nombre "G.D.A." y la producción tomó ulteriormente potencialidad y con automatización hasta llegar a hoy día, donde todas las fases son robotizadas. El óptimo resultado alcanzado ha permitido la introducción de la G.D.A. en cada continente, haciendo una de las mejores realidades en la construcción de hojas circulares en metal duro. Desde 2006 la compañía GDA PIKL ha estado presente en la República Checa, dirigida por Sr. Píkl; la compañía es provista de un almacén bien surtido y un amplio servicio de ventas y asistencia en el área.

Desde 2010 muchas otras colaboraciones también han comenzado con varios distribuidores en muchos países europeos.

En 2015 se introdujeron nuevos sistemas de control, todo para continuar a mejorar la calidad del producto GDA.

En 2017 iniciamos un camino de renovación tecnológica en todos los departamentos, en la planificación y gestión de la producción. Este proceso finalizó en 2019; ahora todos los departamentos están equipados con tabletas donde los operadores encuentran todas las instrucciones; todas las máquinas están conectadas a la red y controladas por un software GesPRO, desarrollado internamente. Por lo tanto, toda la producción está conectada según la Industria 4.0, lo que nos ha permitido un nuevo desarrollo tecnológico adicional con importantes beneficios en términos de productividad y control.

GDA E L'AMBIENTE

la GDA è situata in Trentino Alto Adige, un luogo noto a tutto il mondo per la bellezza delle proprie montagne, le Dolomiti, da poco patrimonio dell'UNESCO, dei propri laghi ed in generale per la cura posta a tutto l'ambiente. Da sempre quindi la nostra azienda ha cercato, per quanto possibile, di usare al proprio interno sistemi e materiali che oltre a garantire un'ottima funzionalità per i nostri clienti, fossero il più possibile eco compatibili. L'ultimo grande investimento del 2009 è stato realizzato sul tetto dell'azienda, un impianto fotovoltaico della potenza di 150 KW, questo ci permetterà di produrre circa 180.000 KW/anno con un risparmio di 20 ton di CO2/anno immesse nell'ambiente. Un altro piccolo passo per la salvaguardia dell'ambiente in cui viviamo.

GDA ET L'ENVIRONNEMENT

L'Enterprise GDA est située dans le Trentin Haut-Adige, un endroit connu dans tout le monde pour la beauté de ses montagnes, les Dolomites, depuis peu patrimoine de l'UNESCO, de ses lacs et, en général, pour le soin pris de tout l'environnement. Depuis toujours, donc, notre société a essayé, autant que possible, d'utiliser en son sein des systèmes et matériaux qui, en plus de garantir une bonne fonctionnalité pour nos clients, étaient le plus possible respectueux de l'environnement.

Le dernier grand investissement date de 2009 : une installation photovoltaïque avec une puissance de 150 KW a été réalisée sur le toit de l'entreprise ; elle nous permettra de produire environ 180.000 KW par an avec une économie de 20 tonnes de CO2 par an pas injecté dans l'environnement. Un petit pas pour la sauvegarde de l'environnement où on habite.

GDA AND THE ENVIRONMENT

The company GDA is situated in Trentino Alto Adige, a place known worldwide for the beauty of its mountains, Dolomiti recently UNESCO, its lakes and in general for the care to the whole environment. Then our company has always tried, wherever possible, to use its internal systems and materials as well as ensuring excellent functionality for our customers, were as environmentally friendly as possible.

The last major investment in 2009 was carried out on the roof of the company, a photovoltaic power of 150 kW, this will enable us to produce about 180.000 Kw/year, with a saving of 20 Ton of CO2 of placing environmental NOT released. Another small step to safeguard our environment.

GDA Y EL AMBIENTE

La empresa GDA se sitúa en Trentino Alto Adige, un lugar conocido en todo el mundo por la belleza de sus montañas, los Dolomitas, recientemente declarado patrimonio de la humanidad por la UNESCO, sus lagos y, en general, el cuidado de todo el ambiente. Por lo tanto, la nuestra empresa siempre ha intentado, en la medida de lo posible, utilizar sistemas y materiales internos que, además de garantizar una excelente funcionalidad para nuestros clientes, fueran lo más ecológicos posible. La última gran inversión en 2009: se realizó una planta fotovoltaica con una potencia de 150 KW en el techo de la empresa; esta planta nos permitirá de producir acerca de 180,000 KW / año con un ahorro de 20 toneladas de CO2 / año no liberado en el medio ambiente. Un otro pequeño paso para salvaguardar el medio ambiente en el que vivimos.

MODO D'IMPIEGO DELLE LAME CIRCOLARI

HOW TO USE CIRCULAR SAW BLADES

MODE D'EMPLOI DES SCIRES CIRCULAIRES

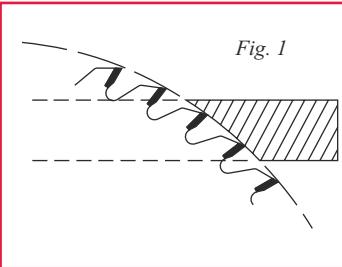

MODO DE EMPLEO DE LAS HOJAS CIRCULARES

I Per ottenere un buon taglio è necessario che 2 o 3 taglienti lavorino contemporaneamente (Fig. 1).

GB If you want to obtain a good cutting quality it is necessary to have two or three teeth working at the same time (Fig. 1).

F Pour obtenir une bonne qualité de coupe c'est nécessaire que 2 ou 3 dents travaillent en même temps (Fig. 1).

E Para que una sierra pueda cortar satisfactoriamente es necesario que por los menos dos o tres dientes trabajen a la vez (Fig. 1).

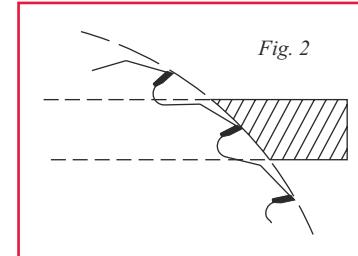

I Se lavora un solo tagliente non si ottiene una buona finitura (Fig. 2).

GB It is impossible to obtain a good cutting quality if only one tooth is working (Fig. 2).

F C'est impossible obtenir une bonne qualité de coupe si seulement un dent travaille (Fig. 2).

E Es imposible que una sierra pueda cortar satisfactoriamente si solo un diente trabaja (Fig. 2).

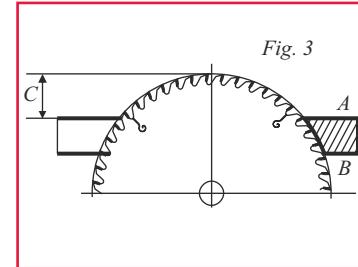

Con l'aumentare di "C", diminuisce la scheggiatura della superficie "A" e aumenta quella della superficie "B". Quando "C" diminuisce avviene il contrario (Fig. 3).

When "C" increases, the chipping of top face "A" decreases, and the chipping of bottom face "B" increases. When "C" decreases "B" decreases and "A" increases (Fig. 3).

Quand "C" augmente, l'ébrecoulement de la surface "A" décroît et l'ébrecoulement de la surface "B" augmente. Quand "C" décroît, "B" décroît et "A" augmente (Fig. 3).

Con el aumentar de "C" decrece el astillado de la superficie "A" y aumenta así la superficie "B" cuando "C" decrece sucede el contrario (Fig. 3).

ORDINAZIONI: nella compilazione dell'ordine precisare:

- 1) Articolo dell'utensile
- 2) Dimensioni dell'utensile ($D \times B \times d \times Z$)
- 3) Numero di codice

- = Lame pronte a magazzino
- = Lame con consegna rapida
- = Lame da costruire
- * = Prezzo a richiesta
- = Eco-sil
- = Sil (Black Silent)
- = Ultra-sil

COMMANDE: preciser les données:

- 1) Article de l'utensile
- 2) Dimension de l'utensile ($D \times B \times d \times Z$)
- 3) Numéro du code

- = Scies circulaires en magasin
- = Scies circulaires avec rapide livraison
- = Scies circulaires à construire
- * = Prix sur demande
- = Eco-sil
- = Sil (Black Silent)
- = Ultra-sil

ORDERS: data to be specified:

- 1) Article of the tool
- 2) Dimension of the tool ($D \times B \times d \times Z$)
- 3) Number of the code

- = Saw blades in stock
- = Saw blades with fast delivery
- = Saw blades to be produced
- * = Price on request
- = Eco-sil
- = Sil (Black Silent)
- = Ultra-sil

ORDENES: datos para hacer el pedido:

- 1) Denominación de la herramienta
- 2) dimensiones de la herramienta ($D \times B \times d \times Z$)
- 3) Número del código

- = Hoja de sierra en stock
- = Hoja de sierra con entrega rápida
- = Hoja de sierra para construir
- * = Precio a petición
- = Eco-sil
- = Sil (Black Silent)
- = Ultra-sil

ISTRUZIONI PER L'USO CORRETTO DELLE LAME

INSTRUCTIONS FOR THE RIGHT USE OF THE SAW BLADES

INSTRUCTIONS POUR LE CORRECT USAGE DES SCIÉS CIRCULAIRES

INSTRUCCIONES PARA EL USO CORRECTO DE LAS HOJAS

Controllare che la lama che si sta montando sia idonea al lavoro da eseguire (ved. pag. 14), perfettamente pulita e non presenti alcuna alterazione provocata da urti o da altri incidenti.

Controllare che l'albero su cui va montata sia:
 - perfettamente diritto
 - del diametro del foro della lama e in tolleranza H 7.

Le flange di bloccaggio devono essere:

- di diametro uguale
- di diametro minimo di 1/3 della lama
- perfettamente parallele e ben pulite
- con il foro ortogonale al piano di appoggio

Eventuali anelli distanziatori devono essere paralleli e ben puliti.

Controllare spesso l'affilatura delle lame e riaffilarle appena necessario mantenendo inalterate le geometrie originali dei denti.

Prima di iniziare la lavorazione controllare che:

- la lama sia ben bloccata.
- la velocità di rotazione sia quella giusta per la lama montata.

You have to check that the saw blade that you are assembling should be perfectly cleaned and suitable for the job you have to do (see page 14) and it doesn't have alterations caused by bumps or other accidents.

The tree for the assemblage must be:

- perfectly straight
- with the same diameter of the hole of the blade and with tolerance H7

The blocking flanges must be:

- with the same diameter between them.
- with the diameter of minimum 1/3 of the diameter of the blade
- perfectly parallel and cleaned
- with the hole orthogonal to the support plan

If there are spacers, they must be parallel and perfectly cleaned.

You've to check frequently the sharp of the blade: the blades need to be immediately sharpened when it's necessary keeping unchanged the original geometries of the teeth.

Before working you have to check that:

- the blade should be perfectly blocked
- the rotation speedy should be right for the blade you've assembled

Vérifier que la lame que vous êtes en train de monter soit indiquée pour le travail que vous devez faire (voir page 14), qu'elle soit parfaitement nettoyée et qu'elle ne soit pas endommagée (heurts ou autres accidents).

L'arbre pour l'assemblage doit être:
 - parfaitement droit
 - avec le même diamètre du trou de la lame et tolérance H7

Vérifier que les brides d'attachement (pour le blocage) soient:

- du même diamètre
- avec un diamètre minimum de 1/3 de la lame
- parfaitement parallèles et nettoyées
- avec le trou orthogonal au plan de soutien

Les éventuels bagues de distance doivent être parfaitement parallèles et nettoyées.

Vérifier souvent l'affûtage des lames et leur donnez le fil toute suite s'il est nécessaire, en maintenant inaltérées les géométries originales des dents.

Avant de commencer le travail, vérifier que:
 - la lame soit bien bloquée
 - la vitesse de rotation soit celle exacte pour la lame que vous devez utiliser.

Controlar que la hoja que se está montando sea idonea al trabajo deseado (ver pag. 14). Perfectamente limpia y que no presente ninguna alteración probocada por golpes u otros accidentes.

Controlar que el arbol de leva en el cual se monta sea:

- perfectamente derecho
- del diametro del orificio de la hoja y tolerancia H7

Controlar que las bridas del bloqueo sean:

- de diámetro igual
- de diámetro mínimo de 1/3 de la hoja
- perfectamente paralelas y bien limpias
- con el orificio ortogonal al plano de apoyo

Eventuales anillos separadores deben ser paralelos y limpios.

Controlar muy seguido la afilacion de las hojas y reafilarlas apenas sea necesario manteniendo inalterada la geometria original de los dientes.

Controlar antes de iniciar el trabajo que:

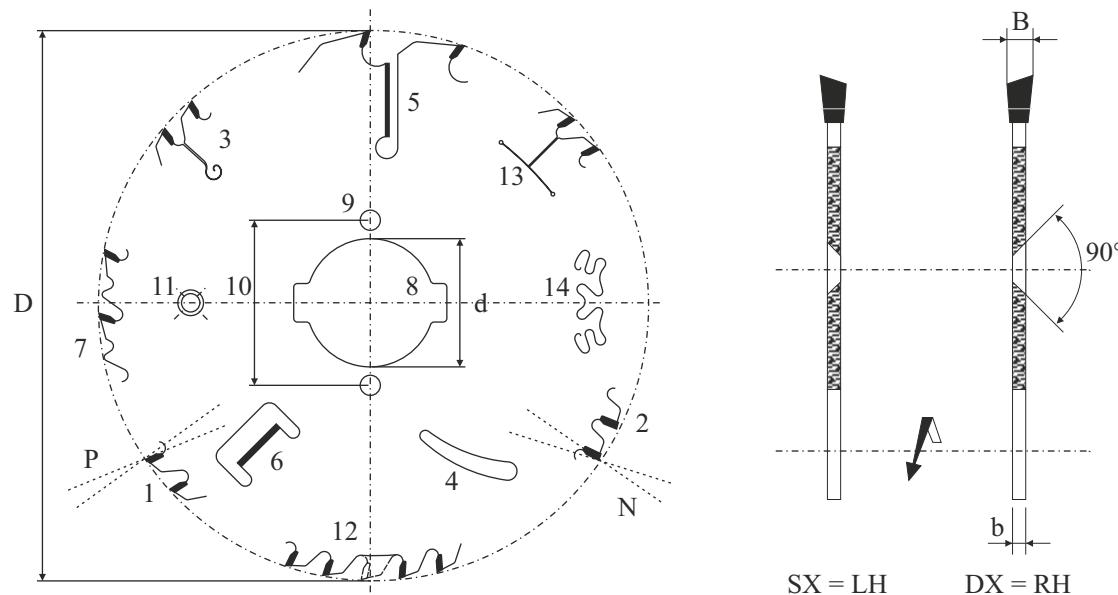

- la hoja sea bien bloqueada
- la velocidad de rotación sea la deseada para la hoja montada

Una serie di intagli con una particolare geometria contribuisce a ridurre il rumore.
Su ogni diametro di lama circolare la posizione è diversa in modo da non influenzare la tensionatura; questi intagli laser non riempiti sono il sistema più economico per diminuire il normale rumore durante il taglio. Particolamente adatti su lame universali per tagli trasversali e longitudinali.
Sul catalogo sono identificate dal simbolo  posto vicino al numero di denti "Z".

Une série de taillages avec une géométrie particulière contribue à diminuer le bruit.
Sur chaque diamètre de la lame circulaire, la position est différente pour ne pas influencer la tension ; ces taillages en laser et pas remplies sont la façon plus économique pour réduire le bruit, qui normalement se produit pendant le débit. Particulièrement indiqués sur les lames universelles pour les débits transversaux et longitudinaux.
Dans le catalogue elles sont identifiées par le symbole  placé à côté du nombre des dents « Z ».

A series of grooves with a particular geometry help to reduce noise; on each diameter of circular saw blades the position of the grooves is different, in this way they don't ruin the tension.
These laser grooves are the cheapest system to decrease noise during normal cutting. Particularly suitable for universal saw blades for transverse and longitudinal cutting.
On the catalogue are identified by the symbol  placed near the number of teeth "Z".

Una serie de cortes con una geometría particular contribuye a reducir el ruido.
Sobre cada diámetro de hojas de sierra, la posición es diferente para no influir sobre la tensión; estos cortes en láser y no llenados son el modo más económico para reducir el ruido, que normalmente se produce durante el corte. Particularmente indicados sobre las hojas de sierra para los cortes transversales y longitudinales.
En el catálogo se identifican por el símbolo  colocados al lado del número de dientes "Z".

LAME CIRCOLARI SIL (BLACK SILENT) GDA

**GDA SIL (BLACK SILENT) CIRCULAR SAW BLADES
SCIÉS CIRCULAIRES GDA SIL (BLACK SILENT)
HOJAS CIRCULARES SIL (BLACK SILENT) GDA**

Uno speciale materiale fonoassorbente viene inserito all'interno di specifici intagli messi in posizioni particolari e diverse per ogni diametro di lama circolare. Tagli di dimensione non troppo grande e particolare forma sono stati studiati per lame da sezionatura, dove la robustezza del corpo sottoposto a grandi sforzi non deve essere compromessa.

Con questa soluzione assorbiamo il rumore e le vibrazioni e rendiamo unica la qualità di taglio e la durata della lama BLACK SILENT GDA da sezionatura.

Concetto simile ma geometria diversa per le lame da alluminio, anche qui uno speciale disegno è stato studiato per esaltare al massimo la prestazione di questa tipologia di lama. La speciale resina BLACK SILENT è resistente agli ultrasuoni e alle temperature elevate, quindi anche dopo numerose riaffilature l'efficienza del trattamento è garantita.

Sul catalogo sono identificate dal simbolo  posto vicino al numero di denti "Z".

Special sound-absorbing material is placed in specific laser grooves placed in special positions and different for each diameter of circular saw blade. Size of laser cuts not too big, and special shape were studied for circular saw blades for panel, where the strength of the body subjected to great efforts must not be compromised.

With this solution the noise and vibration are absorbed and obtained cutting quality and the duration of the circular saw blade BLACK SILENT GDA for panel are unique.

Similar concept but different geometry for aluminium circular saw blades, again a special cut was designed to bring out the best performance of this type of blade. The BLACK SILENT special resin is resistant to ultrasonic and high temperatures, so even after several regrinding the treatment efficiency is guaranteed.

On the catalogue are identified by the symbol  placed next to the number of teeth "Z".

Un matériel spécial insonorisant est inséré dans des taillages spécifiques placés en positions particulières et différentes pour chaque diamètre de lame circulaire. Des taillages de dimension pas trop grand et faits en forme particulière sont étudiés pour les lames pour le débit de panneaux, où la robustesse du corps, soumis à des grands efforts, ne doit pas être compromise.

Avec cette solution, le bruit et la vibration sont absorbées et nous rendons unique la qualité du débit et la durée des lames BLACK SILENT GDA pour le débit de panneaux.

Le concept est le même, mais la géométrie est différente, pour les lames pour l'acier, ici aussi un dessin spécial a été étudié pour améliorer au maximum la prestation de cette typologie di lame. La résine spéciale BLACK SILENT est résistante aux ultrasons et aux hautes températures ; donc, même après beaucoup d'affûtages, l'efficience du traitement est garantie.

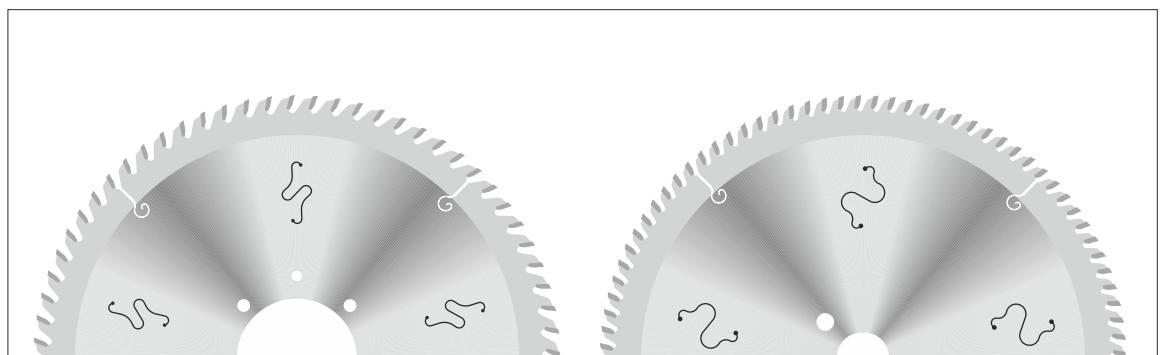

Dans le catalogue elles sont identifiées par le symbole  placé à côté du nombre des dents « Z ».

Un material especial que insonoriza es insertado en cortes específicos colocados en posiciones particulares y diferentes para cada diámetro de hoja de sierra. Cortes de dimensión no más grande y en forma particular son estados estudiado para la hoja para el despieceado de tableros, donde la robustez del cuerpo, sometido a grandes esfuerzos, no debe ser comprometida.

Con esta solución, el ruido y la vibración son absorbidos y hacemos única la calidad del corte y la duración de la hoja BLACK SILENT GDA para el despieceado de tableros.

El concepto es lo mismo, pero la geometría es diferente, para las hojas para el acero, aquí también un dibujo especial fue estudiado para mejorar como máximo la prestación de esta tipología de hoja. La resina especial BLACK SILENT es resistente a los ultrasonidos y a las temperaturas altas; pues, hasta después de muchas afiladuras, la eficiencia del tratamiento es garantizada.

En el catálogo se identifican por el símbolo  colocados al lado del número de dientes « Z ».

LAME CIRCOLARI ULTRA-SIL GDA

GDA ULTRA-SIL CIRCULAR SAW BLADES

SCIÈS CIRCULAIRES GDA ULTRA-SIL

HOJAS CIRCULARES ULTRA-SIL GDA

Dove è richiesto il massimo abbattimento possibile del rumore, adatta su qualsiasi tipo di lama in particolare per universali su taglio traverso e lungo vena.

La superiorità delle lame silenziate GDA nasce da una serie di studi e dall'impegno di nuove tecnologie; infatti grazie alla oculata posizione dei tagli "silenziatori", alla loro forma, dimensione, numero, ma soprattutto al materiale fono-assorbente inserito, si ottengono degli ottimi risultati.

Gli speciali "silenziatori" GDA permettono di assorbire sia longitudinalmente che trasversalmente le "onde sonore" che si generano durante il taglio.

Numerosi sono perciò i vantaggi:

- assenza di vibrazioni
- miglior finitura di taglio
- rumorosità notevolmente ridotta

Sul catalogo sono identificate dal simbolo  posto vicino al numero di denti "Z".

The superiority of the GDA low-noise saw blades results from a series of studies and from the use of new technologies; in fact, thanks to the ingenious position of our "silent cuts", to their form, dimension, number and most of all to the noise absorbing material inside, you can obtain very good results.

The special GDA "silent cuts" enable the absorption of the "sound-waves" that are produced during the cutting both longitudinally and transversally.

Therefore there are many advantages:

- absence of vibration
- better finished cut
- noise level drastically reduced

In the catalog are identified by the symbol  placed next to the number of teeth "Z".

Fig. 1

Fig. 2

La supériorité des lames silencieuses GDA est née depuis longues études et avec l'emploi des nouvelles technologies : en effet, grâce à la position des "coupes silencieuses", à leur forme, dimension, numéro, mais surtout au matériel insonorisant inséré, nous pouvons obtenir des excellents résultats.

Les spéciaux "silencieux" GDA nous permettent d'absorber soit longitudinallement que transversalement les ondes sonores que naissent pendant le découpage.

Les avantages sont nombreux :

- absence des vibrations
- meilleure finition de découpage
- bruit extrêmement réduit

Dans le catalogue sont identifiés par le symbole  placé à côté du nombre de dents "Z".

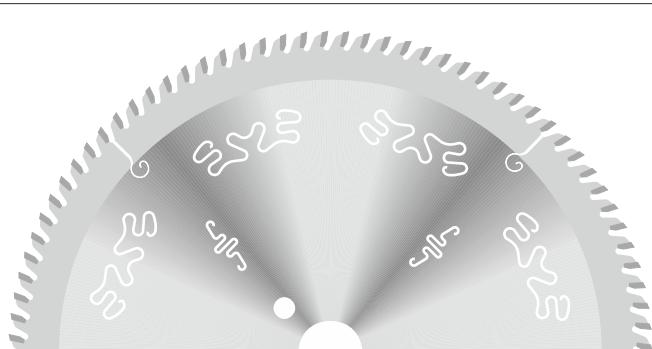

La superioridad de las hojas silenciadas GDA nace de una serie de estudios y del uso de nuevas tecnologías; por lo tanto, gracias a la atenta posición de los cortes "silenciadores", a las formas, dimensiones, número y sobretodo al material, fono - absorbente incluido, se logran óptimos resultados.

Los especiales "silenciadores" GDA permiten de absorber sea longitudinalmente que transversalmente las "ondas sonoras" que se generan durante el corte.

Numerosas son las ventajas:

- ausencia de vibraciones
- mejor ejecución de corte
- rumor notablemente reducido

En el catálogo se identifican por el símbolo  colocados al lado del número de dientes "Z".

NUOVO RIVESTIMENTO "GDA - COATED"

NEW SAW BLADE "GDA - COATED"

NOUVEAU REVETEMENT "GDA - COATED"

NUEVO REVESTIMENTO "GDA - COATED"

La ditta G.D.A. nel suo programma di ricerca e sviluppo ha creato una nuova tipologia di lame denominate "GDA COATED". Dette lame hanno la particolarità di non essere soggette alla corrosione e alla ruggine, di essere antiaderenti, di avere minore attrito durante la lavorazione, di ridurre notevolmente la temperatura del corpo lama durante il taglio, di diminuire l'assorbimento di corrente elettrica e sono perciò particolarmente indicate in tutte quelle situazioni ove c'è un'alta percentuale di umidità, all'aria aperta (cantieri edili), nelle segherie, dove si lavora con materiale bagnato, molto umido o con tendenza ad incrostante (plastiche, gomme etc.), dove sono presenti resina o colle e dove è richiesto minor attrito (tagli sottili).

L'eccezionalità delle lame "GDA COATED" consiste nel fatto che il corpo della lama, anche nelle lavorazioni più difficoltose, tende a rimanere sempre pulito e diritto, quindi l'utensile risulterà sempre perfettamente efficiente.

Tutte le lame del presente catalogo possono essere richieste con tipologia "GDA COATED".

La funzionalità del sistema "GDA COATED" è garantita per tutta la durata della lama.

During his program of research and development, the GDA company has built a new kind of saw blades called "GDA COATED". These saws don't suffer the corrosion and the rust, they're not sticking, they produce less friction during the use, they reduce the temperature of the body of the saw blade during the cut, they reduce the absorption of electricity and so, they're particularly indicated for all the situations where there is an high percentage of humidity, at the open air (building sites), in the saw-mills, when it's necessary working with wet material or with material very humid or with tendency to encrust (plastic and rubber etc.), where there are resin or glue, and where it's necessary less friction (thin cut).

The exceptionality of the saw "GDA COATED" is that the body remains cleaned and straight even during difficult working and so the tool will be always very efficient.

All the saw blades in this catalogue could be ordered with the typology "GDA COATED".

The functionality of the system "GDA COATED" is guaranteed for all the life of the saw.

La G.D.A. pendant le programme de recherche et développement a créé une nouvelle typologie de lames appelées "GDA COATED". Pour leur propriétés de ne subir pas de corrosion et de rouille, d'être anti-adhérent, de ne produire pas de frottement, de réduire considérablement la température du corps de la lame pendant le travail et de réduire l'absorption d'électricité ces lames sont particulièrement indiquées pour toutes les situations où il y a une haute pourcentage de humidité, à l'air ouverte (chantiers de constructions), dans les scieries, avec le matériel mouillé, très humide ou avec la tendance à incrustez (plastique et gomme), où il y a résine et colle, et où c'est nécessaire un minore frottement (coupes fines).

L'exceptionnalité de la lame "GDA COATED" est le fait que le corps de la lame tende à rester net et droit aussi pendant le travail plus difficile, donc l'outil sera toujours parfaitement efficient.

Toutes les lames de ce catalogue peuvent être demandées avec la typologie "GDA COATED".

La fonctionnalité du système "GDA COATED" est garantie pour toute la vie de la lame.

La empresa G.D.A. en su programa de búsqueda y desarrollo ha creado una nueva tipología de hojas llamadas "GDA COATED". Dichas hojas tienen la particularidad de no ser sujetas a la corrosión ni al errumbe, de ser anti-adherente, de tener menor frotamiento durante la elaboración, de reducir notablemente la temperatura del cuerpo de la hoja durante el corte, de disminuir el consumo de corriente eléctrica y son por lo tanto particularmente indicadas en todas aquellas situaciones donde hay un alto porcentaje de humedad, al aire abierto (barraca de la edilicia), en los aserraderos, donde se trabaja con material bañado, muy humedo o con tendencia a incrustaciones (plástica, gomas, etc) donde se presentan resinas o colas y donde se pide menor frotamiento (cortes finos).

La excepcionalidad de las hojas "GDA COATED" consiste en el hecho que el cuerpo de la hoja, también en las elaboraciones mas difíciles tiende a quedarse siempre limpio y derecho, por lo tanto, los utensilios resultan siempre perfectamente eficaces.

Todas las hojas del presente catálogo pueden ser pedidas con tipología "GDA COATED".

La funcionalidad del sistema "GDA COATED" es garantizada por toda la durada de la hoja.

SISTEMA DI FISSAGGIO HYDRO

HYDRO CLAMPING SYSTEM

LE SYSTEM DE FIXAGE HYDRO

SISTEMA DE FIJACION HYDRO

Il sistema Hydro consiste in due manicotti d'acciaio tra i quali c'è uno strato di grasso che trasmette la pressione e li fa espandere verso l'albero e l'utensile, eliminando errori di centratura.

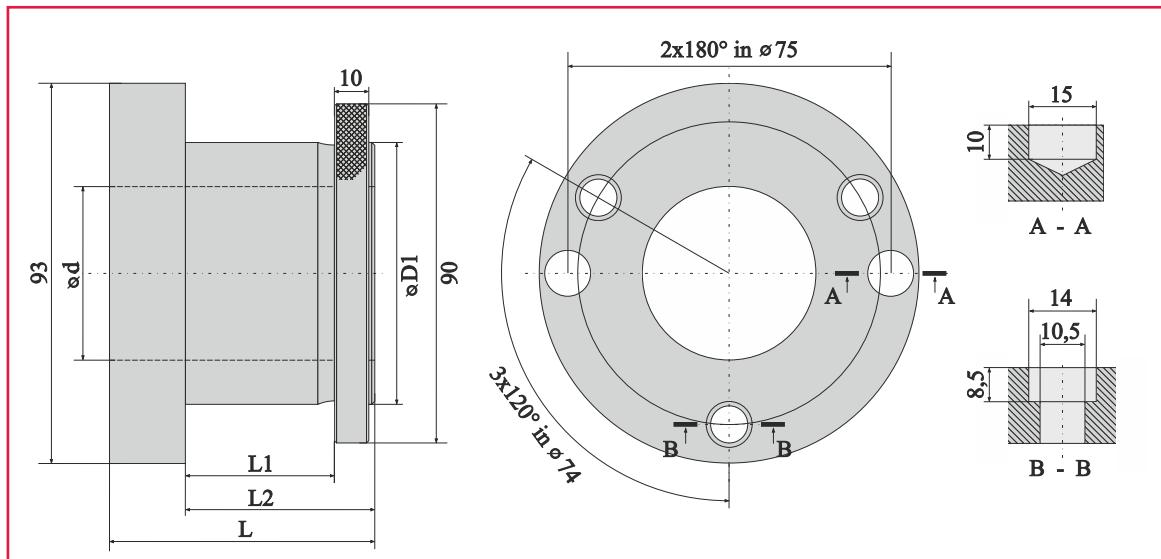

In the Hydro system a layer of grease between two hardened steel sleeves transmits the pressure and permits their expansion towards the spindle and the tool so the error of centring is eliminated.

Le system Hydro est composé par deux manchons en acier entre lesquels il y a une couche de graisse qui transmette la pression et permette leur expansion vers l'arbre et l'outil éliminant ainsi les erreurs de centrage.

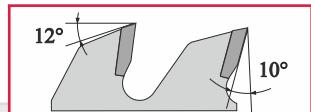

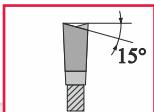

El sistema Hydro consiste en dos mangos de acero entre los cuales hay un estrato de graso que transmite la presión y lo hace derramar hacia el árbol de caña y al utensilio, eliminando errores de centraje.

PRODUZIONI SPECIALI

SPECIAL PRODUCTION

PRODUCTIONS SPÉCIAUX

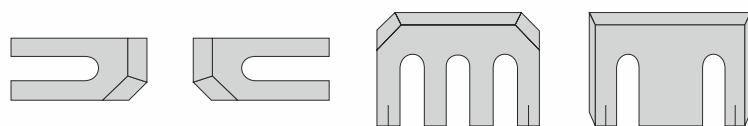

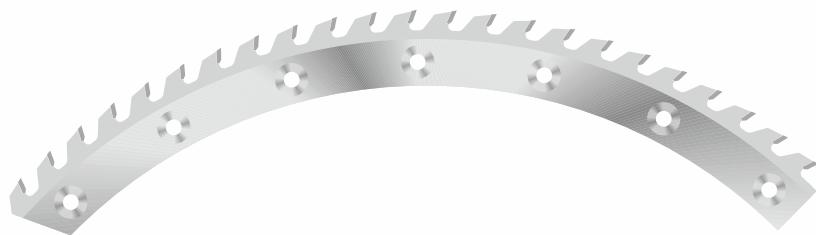

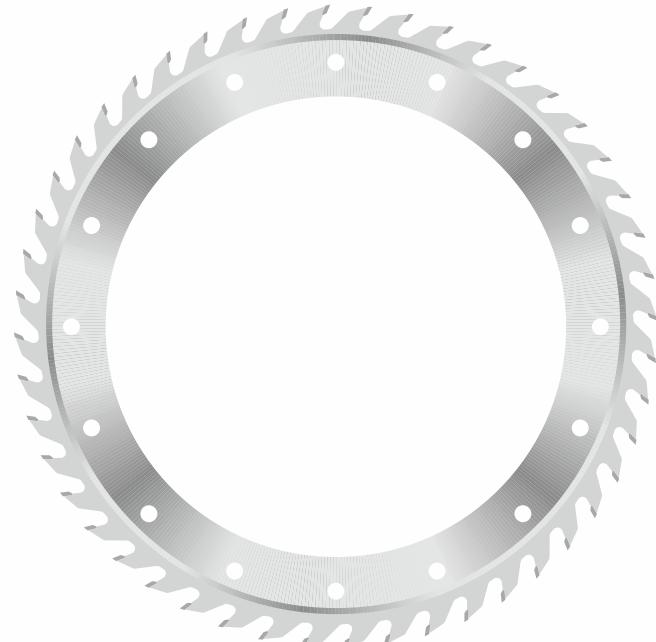

PRODUCCIÓN ESPECIALES

Su richiesta si producono a disegno segmenti, lame circolari e coltelli per Canter per tutti i tipi di macchine (Bongiovanni, EWD, Linck, Mohringer, Primultini, SAB, ecc....)

Sur demande on produit des dessins spéciaux de segments, lames circulaires et couteaux pour Canter pour tous les types de machines (Bongiovanni, EWD, Linck, Mohringer, Primultini, SAB, etc.).

On request we can produce special design of segments, circular saw blades, knives for Canter for all the machines (Bongiovanni, EWD, Linck, Mohringer, Primultini, SAB, ecc....)

Sobre solicitud producimos dibujos especiales de segmentos, hojas de sierra y cuchillas por Canter por todos los tipos de máquinas (Bongiovanni, EWD, Linck, Mohringer, Primultini, SAB, etc.).

GRAZIE ALLA SPECIALE GEOMETRIA DEL CORPO LAMA, ALLA SILENZIATURA E AD ANGOLI DI AFFILATURA SPECIFICI OTTENIAMO UN'OTTIMA FINITURA E UNA RUMOROSITÀ RIDOTTA AL MINIMO.

THANKS TO THE SPECIAL GEOMETRY OF THE SAW BLADE'S BODY, TO THE NOISELESS SYSTEM AND TO THE SPECIFIC SHARPENING'S ANGLES, WE OBTAIN AN EXCELLENT FINISHED CUT AND A CONSIDERABLE NOISE'S REDUCTION.

GRÂCE À LA GÉOMÉTRIE SPÉCIALE DU CORPS DE LA LAME, AU TAILLAGE SILENCIEUX ET AUX ANGLES D'AFFUTAGE SPÉCIFIQUE, ON OBTIENT UNE EXCELLENTE FINITION ET UN BRUIT RÉDUIT AU MINIMUM.

GRACIAS A LA GEOMETRÍA ESPECIALE DEL CUERPO DE LA HOJA, AL CORTE SILENCIOSO Y A LOS ÁNGULOS D'AFILADO ESPECÍFICO, OBTENEMOS UNA OPTIMA FINITURA Y EL RUIDO SE REDUCE AL MÍNIMO.

E Desmenuzadores universales a baja rumurodidad

D 200 x 30

D 250 / 300 / 350 x 30

D 330 x 90

INFORMAZIONI TECNICHE

Trattasi di gruppi truciolatori a "BASSA RUMOROSITA'" con lame HM. Corpo in lega leggera con lame per truciolare posizionate a taglio elicoidale, anelli fono-assorbenti e lama principale.

E' possibile la costruzione di truciolatori con diametro e spessori speciali (D-B-d) per qualsiasi particolare esigenza di lavorazione.

TECHNICAL INFORMATION

Group of "LOW NOISE" trimming hoppers, with circular saw blades HM. Light metal body with circular saw blades to chips, assembled with spiral multicut, low noise rings and main circular saw blades.

It is possible manufacturing trimming hoppers with diametre and thickness (D-B-d) for every type of work requested.

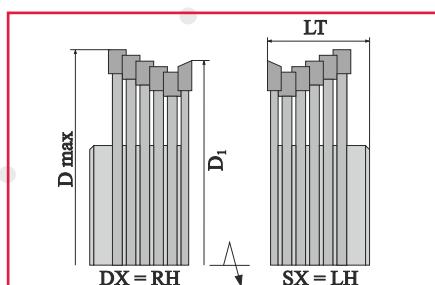

INFORMATIONS TECHNIQUES

Il s'agit d'un groupage de déchiqueteurs silencieux avec lames HM. Le corps est en alliage léger avec les lames pour réduire en copeaux positionnées pour une coupe hélicoïdale, les bagues qui absorbent le bruit et la lame principale. C'est possible la construction de déchiqueteurs avec diamètre et épaisseur spéciaux (D-B-d) pour chaque exigence de travail.

INFORMACIONES TECNICAS

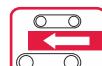

Tratandose de grupos desmenuzadores a "BAJA RUMUROSIDAD" con hojas HM. Cuerpo en liga ligera con hojas para desmenuzadores posicionados a corte helicoidal, anillos fono-absorbentes y hoja principal.

Es posible la construccion de desmenuzadores con diametro y espesores especiales (D-B-d) para qualquier tipo de trabajo

FRESE IN DIAMANTE REGOLABILI PER RETTIFICARE

DIAMANTE/PCD

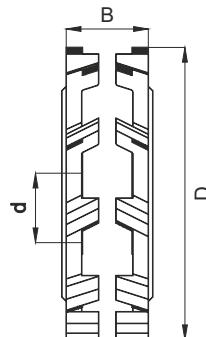

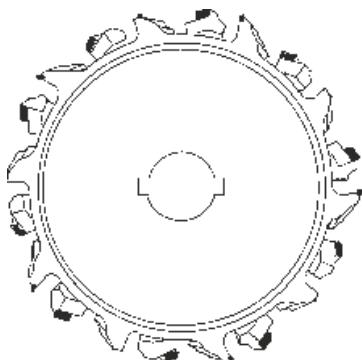

Adjustable jointing cutters in diamond

Fraise réglables
en diamant
pour rectifier

Antiastillas ajustable en diamante por rectificar

Fresa in diamante PCD per rettificare, composta da due elementi regolabili tramite spessori, adatta per lavorazioni di pannelli truciolari, nobilitati, rivestiti, laminati, impiallacciati, M.D.F., utilizzabile su macchine squadratrici. Ottima finitura, bassa rumorosità.

Adjustable jointing cutter in diamond PCD, made in two pieces adjustable by spacer rings, suitable for working on chipboard panels, coated, laminated, veneered, M.D.F., it can be used on squaring and edgebanding machines. Excellent finishing, low noisiness.

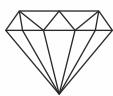

Fraise en diamant PCD pour rectifier, composée de deux pièces réglables à travers des cales, indiquée pour les travaux des panneaux de copeaux, revêtus, recouverts, laminés, plaqués et pour les panneaux de fibres à densité moyenne (ou M.D.F.), utilisable sur des machines pour l'équarrissage. Finition excellente, bruit faible.

Antiastilla extensible en diamante PCD, compuesta de dos cuerpos regulables por medio de anillos, adecuado para trabajar en paneles de aglomerados revestidos, laminados, chapados, D.M., utilizable en máquinas para escuadrar y chapar. Óptimo acabado, baja rumorosidad.

INFORMAZIONI TECNICHE

Trattasi di gruppi truciolatori a "BASSA RUMOROSITA'" con in PCD. Corpo in lega leggera con 5 lame per truciolare posizionate a taglio elicoidale e 4 anelli fono-assorbenti e lama principale.

E' possibile la costruzione di truciolatori con diametro e spessori speciali (D-B-d) per qualsiasi particolare esigenza di lavorazione.

TECHNICAL INFORMATION

Group of "LOW NOISE" trimming hoggers, with circular saw blades in PCD. Light metal body with 5 circular saw blades to chips, assembled with spiral multicut and 4 low noise rings and main circular saw blades.

It is possible manufacturing trimming hoggers with diametre and thickness (D-B-d) for every type of work requested.

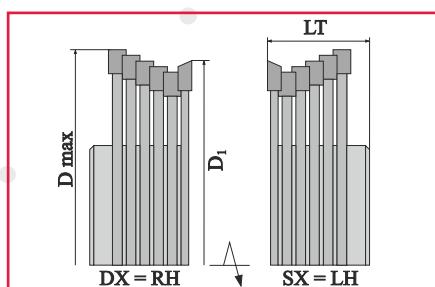

INFORMATIONS TECHNIQUES

Il s'agit d'un groupage de déchiqueteurs silencieux avec lames en PCD. Le corps est en alliage léger avec 5 lames pour réduire en copeaux positionnées pour une coupe hélicoïdale et 4 bagues qui absorbent le bruit et la lame principale. C'est possible la construction de déchiqueteurs avec diamètre et épaisseur spéciaux (D-B-d) pour chaque exigence de travail.

INFORMACIONES TECNICAS

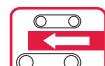

Tratandose de grupos desmenuzadores a "BAJA RUMUROSIDAD" con hoja en PCD. Cuerpo en liga ligera con 5 hojas para desmenuzadores posicionados a corte helicoidal y 4 anillos fono-absorbentes y hoja principal.

Es posible la construcion de desmenuzadores con diametro y espesores especiales (D-B-d) para qualquier tipo de trabajo

The diagram illustrates four different configurations of a wooden joint. Each configuration consists of a wooden board with a U-shaped slot and a white rectangular component being inserted. The top row shows two configurations with a thickness of 8 mm. The first has a height of 23 mm and the second has a height of 35 mm. The bottom row shows two configurations with a thickness of 8,6 mm. The first has a height of 29 mm and the second has a height of 41 mm.

TESTA PORTACOLTELLI PER GIUNZIONI TIPO "FINGER JOINT"

Jointing cutterhead
type "finger joint"Tête porte-couteaux pour jonctions
type « finger joint »Cabeza puertas-cuchillas para
junciones tipo "finger joint"

Testa portacolletti in acciaio ad alta resistenza a 4, 6 o 8 taglienti per eseguire giunzioni tipo "finger joint". Si tratta di un utensile componibile che permette di utilizzare più teste a seconda dello spessore del legno da lavorare. I coltelli sono intercambiabili e a profilo simmetrico. Le dimensioni delle giunzioni ottenibili sono : 10/10mm, 10/11mm, 15/15mm, 15/16,5mm, 20/20mm e 20/22mm. I coltelli sono prodotti in HS trattati con un particolare rivestimento superficiale PVD che ne aumenta la durata fino a un 100% in più e in HW (solo per le dimensioni 10/10mm e 10/11mm). Le dimensioni dei coltelli 10/11mm, 15/16,5mm e 20/22mm sono adatte per lavorazioni su macchine che utilizzano la lama ad intestare e su impianti specifici. I profili 15/15mm e 20/20mm sono adatti per macchine definite "compatte". L'utensile è adatto per eseguire giunzioni per utilizzi differenti, dalla produzione di profili lamellari in legno per serramenti ai semilavorati per arredamento. Con i profili più profondi (20/20mm e 20/22mm) si ottengono giunzioni per strutture portanti in legno lamellare (norme UNI 8922, DIN 68140 e DIN 1052), particolarmente adatte per grandi luci quali impianti sportivi, capannoni industriali, aree espositive, ponti, ecc. In fase d'ordine specificare il tipo di macchina sulla quale gli utensili saranno montati.

Finger joint cutter head body in high tensile steel with 4, 6 or 8 knives for manufacturing finger joints. The tool can be stacked based on the wood thickness to be cut. The knives are interchangeable and have a symmetrical profile. The following joints are available : 10/10mm, 10/11mm, 15/15mm, 15/16,5mm, 20/20mm and 20/22mm.

The knives are manufactured in solid HS with special PVD surface coating for longer tooling life (up to 100% increase). Profiles 10/11mm, 15/16,5mm and 20/22mm are specific for butting machines. The tool is suitable for use in various fields :laminar profiles, window frames, furniture, etc.

The deepest profiles (20/20mm and 20/22mm) are appropriate for glue-jointed structural wood elements for construction (DIN 68140 and DIN 1052 specifications). Profiles 15/15mm and 20/20mm are suitable to be mounted on "compact" machines. When ordering specify the type of machines on which the tool will be mounted.

Tête porte-couteaux en acier à haute résistance avec 4, 6 ou 8 couteaux pour effectuer des jonctions type « finger joint ». Il s'agit d'un outil à élément, qui permet d'utiliser plusieurs têtes selon l'épaisseur du bois à travailler. Les couteaux sont interchangeables et avec un profil symétrique. Les dimensions des jonctions réalisables sont : 10/10 mm, 10/11 mm, 15/15 mm, 15/16,5 mm, 20/20 mm et 20/22 mm.

Les couteaux sont produits en HS, traités avec une chape superficielle PVD qui augmente la durée jusqu'à 100% en plus et en HW (seulement pour les dimensions 10/10 mm et 10/11 mm). Les dimensions des couteaux 10/11 mm, 15/16,5 mm et 20/22 mm sont indiquées pour les travaux sur des machines qui utilisent la lame à abouter et sur des installations spécifiques. Les profils 15/15 mm et 20/20 mm sont indiqués pour des machines définies « compacte ». L'outil est indiqué pour effectuer des jonctions pour des emplois différents, de la production des profils lamellaires en bois pour bâti aux demi-produits pour l'ameublement. Avec les profils plus profondes (20/20 mm et 20/22 mm) on obtient des jonctions pour des structures portantes en bois lamellaire (règles UNI 8922, DIN 68140 et DIN 1052), particulièrement indiquées pour des grands portées comme installations sportives, halles industrielles, aires pour expositions, ponts, etc. . En phase d'ordre il faut préciser le type de machine sur laquelle les outils seront montés.

Cabeza puertas-cuchillas de acero a alta resistencia con 4, 6 o 8 cuchillas para realizar junciones tipo "finger joint". Se trata de una herramienta componible, que permite l'utilización de varias cabezas según el espesor de la madera a trabajar. Las cuchillas son intercambiables y con una perfil simétrica. Las dimensiones de las junciones realizables son: 10/10 mm, 10/11 mm 15/15 mm, 15/16,5 mm, 20/20 mm y 20/22 mm.

Las cuchillas son producidas en HS, tratadas con un revestimiento superficial PVD que aumenta la duración hasta el 100% en más y en HW (solamente para las dimensiones 10/10 mm y 10/11 mm). Las dimensiones de las cuchillas 10/11 mm, 15/16,5 mm y 20/22 mm son indicados para los trabajos sobre las máquinas que utilizan la hoja para encabezar y sobre instalaciones específicas. Las perfiles 15/15 mm y 20/20 mm son indicadas para las máquinas definidas "compactas". La herramienta es indicada para realizar funciones para empleos diferentes, de la producción de las perfiles laminares de madera para edificios a los semitabajados por el moblaje. Con las perfiles más profundas (20/20 mm y 20/22 mm) obtenemos junciones para estructuras soportes de madera laminares (reglas UNI 8922, DIN 68140 y DIN 1052), particularmente indicadas para grandes transportadas como instalaciones deportivas, plazas industriales, áreas para exposiciones, puentes, etc.. En fase de pedido hay que precisar el tipo de máquina la cual las herramientas habrán subido.

1ST OPERATION: BUTTING WITH HOGGING UNIT FINGER LENGTH SETTING (SEE ART. IM 702 / IM 720).

PREMIÈRE PHASE : ENTURE AVEC GROUP COUPEUSE À BOIS DE LA LONGUEUR DE LA DENT (VOIR ARTICLE IM 702 / IM 720).

PRIMERA FASE: REBAJE CON GRUPO DESMENZADORA Y REGULACIÓN DE LA LONGITUD DEL DIENTE (VER ARTÍCULO IM 702 / IM 720).

2° FASE: ESECUZIONE GIUNZIONE.

2ND OPERATION: JOINTING OPERATION.

DEUXIÈME PHASE : EXÉCUTION DE L'OPÉRATION.

SEGUNDA FASE: EJECUCIÓN DE LA OPERACIÓN.

Per lavorazioni su macchine dotate di utensile ad innestare, in base al legno da lavorare e al dispositivo di pressatura, le giunzioni, 10/11mm, 15/16,5mm e 20/22mm permettono di ottenere giunti a dita nel rispetto delle norme vigenti.

To work on machines provided with engaging tool depending on the wood to be carved and the pressing's device, the joints, 10/11mm, 15/16,5mm and 20/22mm allow to obtain finger joints within the laws in force.

Pour des travaux sur des machines équipées d'outil à brancher, selon le bois à travailler et le dispositif à presse, les jonctions, 10/11 mm, 15716,5 mm et 20/22 mm permettent d'obtenir des joints à doigts dans le respect des règles en vigueur.

Por elaboraciones sobre máquinas dotadas de herramienta para enchufar, según la madera a trabajar y el aparato de presura, las junciones, 10/11mm, 15/16,5mm y 20/22mm permiten de conseguir juntos a dedos en el respeto de las normas vigentes.

junciones tipo "finger joint"

Teste in acciaio ad alta resistenza con inserti in HM per eseguire giunzioni tipo "finger" verticali e orizzontali profilo 10/11. L'utensile garantisce un elevato rendimento sia nella lavorazione di legni teneri sia di quelli duri/esotici. Facile sostituzione e posizionamento dei coltelli. Possibilità di riaffilatura (3,5 mm max).

High-strength steel heads with inserts in HW for horizontal and vertical "finger"-type joints, profile 10/11.

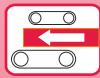

The tool guarantees high efficiency in the working of both soft and hard/exotic woods. Easy replacement and positioning of the blades. Possibility of re-sharpening (3,5 mm max).

Têtes en acier à haute résistance avec élément en HW pour exécuter des jonctions type "finger joint" verticaux et horizontaux, profil 10/11. L'outil garantit un rendement élevé dans les travaux de bois tendres et de bois durs/exotiques aussi. Remplacement et mise en place faciles.

Cabezas de acero a alta resistencia con elemento de HW para ejecutar junciones tipo "finger joint" verticales y horizontales perfil 10/11. La herramienta garantiza en elevado rendimiento tanto en l'elaboración de maderas tiernas come de maderas duras/exóticas.

TESTA PORTACOLTELLI COSTRUITA IN ACCIAIO AD ALTA RESISTENZA
CON UN DISPOSITIVO PER IL SERRAGGIO IDRAULICO DELL'UTENSILE
SULL'ALBERO DELLA MACCHINA.

CUTTERHEAD WITH HYDRAULIC CENTERING AND CLAMPING. TOOL BODY IS
MADE OF HIGH TENSILE STEEL AND THE LOCKING ON THE MACHINES SPINDLE
IS ACHIEVED WITH TWO SPECIAL SLEEVES.

TÊTE PORTE-COUTEAUX FAITE EN ACIER À HAUTE RESISTANCE
AVEC UN DESPOSÍTIF POUR LE SERRAGE HYDRAULIQUE DE L'OUTIL SUR
L'ARBRE DE LA MACHINE.

CABEZA PUERTAS-CUCHILLAS HECHO D'ACERO CON UNO MECANISMO PARA
EL AJUSTE HIDRÁULICO DEL HERRAMIENTA SOBRE EL ÁRBOL DE LA MÁQUINA.

Si costruiscono anche teste
We produce heads too

CONDIZIONI GENERALI DI VENDITA

ORDINI

Tutte le ordinazioni dovranno pervenirci con ordine scritto ed eventuali richieste emesse verbalmente avranno valore solo dopo la nostra conferma d'ordine ed alle condizioni in essa riportate. Non si accettano annullamenti, anche parziali, trascorse 24 ore dall'invio dell'ordine se non in via eccezionale, riservandoci comunque il diritto di richiedere il rimborso delle spese sostenute fino a quel momento. Gli ordini non dovranno essere di importo inferiore a € 150,00. Eventuali ordini di minor importo, potranno essere da noi ritardati nella consegna in modo da accumulare diversa merce sino al raggiungimento della cifra minima stabilita. In caso di urgenza, sarà possibile una spedizione anche di valore inferiore, ma verranno addebitati € 25 in fattura quale contributo spese per la gestione dell'ordine.

CONSEGNE

I termini di consegna pattuiti saranno nel possibile rispettati. Eventuali ritardi, conseguenze di disguidi indipendenti dalla nostra volontà, non potranno essere motivo di annullamento o di richieste di indennizzi di nessun genere.

SPEDIZIONI

La merce viene resa franco nostro stabilimento e spedita, salvo accordi stabiliti, con il mezzo da noi ritenuto più vantaggioso. La merce viaggerà sempre a rischio e pericolo del committente. Eventuali assicurazioni dovranno essere esplicitamente richieste e saranno fatturate al costo. L'imballo è sempre a carico del committente ed addebitato al costo.

GARANZIA

Tutti i nostri utensili sono sottoposti ad accurati controlli e sono completamente garantiti. La garanzia esula da danni subiti dalla merce durante il trasporto ed inoltre nessuna garanzia sarà riconosciuta per difetti causati da errata manutenzione, logorio, uso improprio o modifiche effettuate senza la nostra approvazione. Richieste di indennizzi per danni diretti o indiretti, causati da utensili ritenuti difettosi, non saranno da noi accettate.

RESTITUZIONE E RECLAMI

Eventuali reclami per merce sbagliata o difettosa dovranno essere inviati alla nostra sede esclusivamente tramite documentazione scritta indicante il difetto riscontrato ed entro 8 giorni dal ricevimento della merce. La ditta GDA non accetta nessun tipo di reso se non espressamente concordato.

PREZZI

I prezzi si intendono con IVA esclusa, merce resa franco nostra fabbrica ed imballo a carico del committente.

PAGAMENTI

Gli importi delle fatture, salvo accordi diversi, vanno pagati per intero alla scadenza stabilita. Tutte le spese accessorie sono a carico del committente. Il mancato rispetto dei termini di pagamento autorizza la GDA al recupero di ogni spesa accessoria, agli interessi maturati e ad un ulteriore tasso del 5% per il recupero spese, riservandosi inoltre il diritto alla sospensione di eventuali ordini in corso. L'eventuale reclamo di parte della fornitura non da diritto al ritardo del pagamento per la parte non contestata, né al mancato pagamento di altre fatture in scadenza.

DIRITTI D'AUTORE

Tutti i diritti sono riservati a norma di legge. E' vietato riprodurre o copiare anche parzialmente, testi, disegni, illustrazioni, senza il consenso scritto della G.D.A. s.r.l.

FORO COMPETENTE

Per qualsiasi eventuale controversia il foro competente è quello di Rovereto (TN). Tutti i contratti stipulati sono regolamentati dalla legislazione italiana.

QUESTO CATALOGO SOSTITUISCE ED ANNULLA OGNI EDIZIONE PRECEDENTE.

GENERAL SALES CONDITIONS

ORDERS

All the orders should be reached in writing. About the orders transmitted by telephone, they will be valid only after our order confirmation and with the terms we will write in it. We can't accept cancellation, nor partial, after 24 hours from the date of the order, except special case, and if accepted, it will be our right to ask the reimbursement of the expenses sustained until that moment. The minimum amount for the orders is € 150,00. It could be possible that we'll delay some orders with lower amount to accumulate material to achieve the minimum fixed. In case of urgency for delivery of the order for lower amount we'll debit € 25,00 in the invoice as contribution for the extra costs of the order management.

DELIVERIES

The delivery time confirmed will be respected as much as possible. Possible delays that don't depend from our company will can not be reasons to cancel the order or to request any compensation.

TRANSPORT

Freight costs and risks will be at the charge of the buyer. Without different agreements, we will ship the material with the most advantageous forwarding agent. Possible insurances must be previously demanded and debited at the real cost in the invoice. The package is at the charge of the buyer and it's debited at the real cost.

WARRANTY

All our products are carefully controlled during the manufacturing and they're guaranteed in every aspect. The guarantee doesn't include damages caused during the transport, defects for wrong or improper use, wear and tear and modifications made without our approval. In any case, claims for direct or indirect damages caused from the tools considered defectives will not be accepted.

CLAIMS AND RETOURS

Claims for wrong or defective goods have to be communicated by written documentation within 8 days from the receipt of the goods mentioning the defect found. Any restitution will be accepted if not previously authorized.

PRICES

Prices are considered without VAT that will be imposed with the share in force at the moment of the invoicing. The prices are ex works and the package is excluded.

PAYMENTS

Without different agreements, the invoice's amount has to be totally paid at the established deadline (date). All the extra expenses are at the charge of the customer. If the terms of payment are not respected, the GDA can interrupt the supplies and debit the accrued interests, with further interest of 5% to cover the extra costs. Claims for part of supplies don't give the right to postpone the term of payment or to not pay other invoices.

RESERVED OWNERSHIP RIGHTS

All rights are reserved in accordance with the law. This catalogue may not be reproduced or copied (even in part) without the written authorization of GDA.

PLACE OF JURISDICTION

For every legal matter the place of jurisdiction is Rovereto (TN). All the contracts are regulated by the Italian legislation.

CONDITIONS GENERALES DE VENTE

COMMANDES

Toutes les commandes doivent être envoyées par écrit. Éventuelles demandes téléphoniques seront valides seulement après notre confirmation d'ordre et aux conditions que nous indiquerons dans la même. Nous n'accepterons pas (si non en voie exceptionnelle) des annulations aussi partiels après les 24 heures de l'envoi de l'ordre et nous nous réservons le droit de demander le remboursement des frais pour les matériaux et les travaux jusqu'à ce moment. Les commandes ne devront pas être de valeur inférieure à € 150,00. Pour éventuelles commandes de petit valeur nous pourrons reculer la livraison pour cumuler différente marchandise et rejoindre la chiffre établie. Une livraison de valeur inférieur sera possible pour les urgences, mais nous débiterons € 25 dans la facture comme contribution pour les frais pour la gestion de l'ordre.

LIVRAISON

Nous ferons tout le possible pour respecter les délais de livraison indiqué dans nos confirmations d'ordre, mais éventuels retards en conséquence des erreurs ou problèmes pas dépendants de notre volonté, ne pourront pas être raison de nullement ou des demandes de dommage.

EXPÉDITION

La marchandise, sans différents accords sera livrée départ-usine avec le transporteur que nous estimerons plus convenable. La marchandise voyagera toujours au risque et danger de l'acheteur. Eventuelles assurances devront être formellement demandées et seront facturées au coût. L'emballage est toujours à la charge de l'acheteur et il est débité au coût.

GARANTIE

Tous nos outils sont soumis à des soigneux contrôles et ils sont complètement garanties. La garantie ne couvre pas éventuels dégâts pendant le transport et aucune garantie sera reconnue pour défauts causés par une entretien erroné, usure impropre, ou modifications effectuées sans notre approbation. Demandes de dommage et intérêts pour dégâts directs ou indirects causés par des outils retenus défectueux ne seront pas acceptées chez nous.

RESTITUTION ET RECLAMATION

Éventuelles réclamations pour marchandise incorrecte ou défectueuse devront être envoyées exclusivement par documentation écrite, en indiquant le défaut dans 8 jours de la réception de la marchandise. La GDA n'accepte pas aucune restitution si non expressément concordée.

PRIX

Les prix sont considérés sans V.A.T. Les coûts de transport et d'emballage sont à la charge du client.

PAIEMENT

Les factures, doivent être entièrement payées, sans différents accords, à l'échéance établie. Tous les frais accessoires sont à la charge du client. Le manqué respect des délais de paiement, autorise la GDA à récupérer chaque frais accessoire, les intérêts échus et avec un ultérieur taux du 5% pour récupérer les frais, en réservant aussi le droit à la suspension des éventuelles commande en cours. L'éventuelle réclamation pour une partie de la fourniture ne donne pas le droit au retard pour le paiement de la marchandise pas contestée ni le non paiement d'autres factures.

DROITS D'AUTEUR

Tous les droits sont réservés aux termes de la loi. La reproduction aussi partielle des dessins, des illustrations ou des textes est interdite l'autorisation écrite de la G.D.A. s.r.l.

TRIBUNAL COMPÉTENT

Pour toute éventuelle controverse la compétence sera du tribunal de Rovereto (TN). Tous les contrats sont réglementés par la législation italienne

CONDICIONES GENERALES DE VENTA

PEDIDOS

Todas las órdenes nos deberán llegar escritas y con el eventual pedido verbalmente tendrán valor solo después de la nuestra conformidad del orden y las condiciones ya aclaradas. No se aceptan anulamientos, ni parciales, transcurridas las 24 horas del envío del orden si no que en manera excepcional, reservandonos de todas maneras el derecho de pedir el gasto, sostenido hasta ese momento. Las órdenes no deberán ser inferiores a 150 €. Eventuales de menor importe, podrán ser de parte nuestra con atraso en la entrega, de manera que se pueda acumular diferente mercadería hasta llegar a la cifra mínima establecida. En el caso de urgencia, será posible una expedición aunque de valor inferior, pero vendrán a su cargo 25 € en factura cual contributo gastos por la gestión del orden.

ENTREGAS

Los términos de entrega de común acuerdo serán en el posible respectados. Eventuales atrasos, consecuencias de desviación independientes a nuestra voluntad, no podrán ser motivo de anulamiento o de pedidos de indemnización de ningún género.

EXPEDICIONES

Las mercaderías en rendición (franco) por nuestra fábrica y que vendrá enviada, con el pacto de acuerdos establecidos, con el transporte que nosotros consideramos más ventajoso. La mercadería viajará siempre a riesgo y peligro del cliente. Eventuales aseguraciones deberán ser explícitamente pedidas y serán facturadas al costo. El embalaje es siempre a cargo del comitente y viene adeudado al costo.

GARANTIA

Todos los nuestros utensilios son sometidos a acurados controles y son completamente garantizados. La garantía no se responsabiliza de los daños sufridos de la mercadería causados por el transporte y además ninguna garantía será reconocida por defectos causados por errada manipulación, desgastes, uso impropio o modificaciones efectuadas sin la nuestra aprobación. Pedidos por indemnización por daños directos o indirectos, causados por utensilios defectuosos, no serán por parte nuestra aceptados.

RESTITUCION Y RECLAMOS

Eventuales reclamos por mercaderías equivocadas o defectuosas deberán ser enviadas a nuestra sede exclusivamente mediante documentación escrita indicando el defecto encontrado y dentro los 8 días del recibimiento de la mercadería. La empresa GDA no acepta ningún tipo de devolución si no es expresamente de común acuerdo.

PRECIOS

Los precios se entienden con IVA exclusa, las mercaderías en rendición (franco) por parte de nuestra fábrica, por lo tanto el embalaje va a cargo del cliente.

PAGOS

Los importes de las facturas, con la excepción de acuerdos diferentes, van pagados por entero a la fecha establecida. Todos los gastos adicionales son a cargo del interesado. El faltado respecto de los términos de pago autoriza la GDA al recupero de cada gasto adicional, los intereses acumulados y además a un interés del 5% del recupero de los gastos, reservandonos además el derecho a la suspensión de eventuales órdenes en curso. Los eventuales reclamos de parte de la provisión no da el derecho al atraso del pago por la parte no contestada, ni al faltado pago de otras facturas en vencimiento.

DERECHOS DE AUTOR

Todos los derechos son reservados a norma de ley. Es prohibido reproducir o copiar aunque parcialmente, textos, dibujos, ilustraciones, sin el consentimiento escrito de la G.D.A. s.r.l.

TRIBUNAL COMPETENTE

Por cualquier controversia el tribunal competente es Rovereto (TN). Todos los contratos estipulados son reglamentados por la legislación italiana.
